

## EMBEDDED LIFT DISPLAY

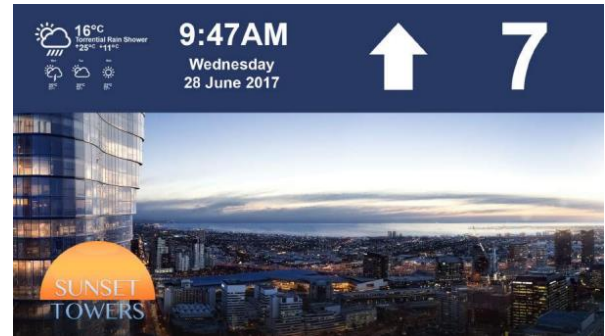

### PRODUCT DATA SHEET

#### DESCRIPTION

The Embedded Lift Display provides a colourful and informative interface compared to conventional lift indicator systems, enabling opportunities to promote tenants, building information, events, news and advertising.

Video playback, image slideshows and dynamic media offer opportunities to promote business, advertising and building information. The user friendly software allows owners to easily configure and update the display layouts via their building network or directly via USB. You also have complete control over the directory content on your display screens at any time – update tenant listings, building notices, advertising and more, all with ease.

High quality commercial-grade LED screens provide wide viewing angles with low power consumption. HDMI output also offers the option of external connectivity to larger format Full HD screens such as foyer displays and digital directory boards, or duplicate displays in lift cabins. The 21.5" screen offers Full HD resolution (1920 x 1080 pixels) for a generous viewing area and greater clarity. This screen is also capable of displaying full screen media content.

Screen Size	Resolution
12.1"	800 x 600
10.4"/15"	1024 x 768
19"	1280 x 1024
21.5"	1920 x 1080 (HD)
