

PASSENGER LIFT SAFETY CHECK

NEW LEGISLATION

The Western Australian State Government is replacing the Occupational Safety and Health Act with a modernised Work Health and Safety Bill based on the National Act.

An owner has a responsibility to ensure that plant is maintained and is safe for users and workers, including the service provider.

Older passenger lifts will not comply with current regulations and community expectations.

74 POINT LIFT SAFETY CHECK UP

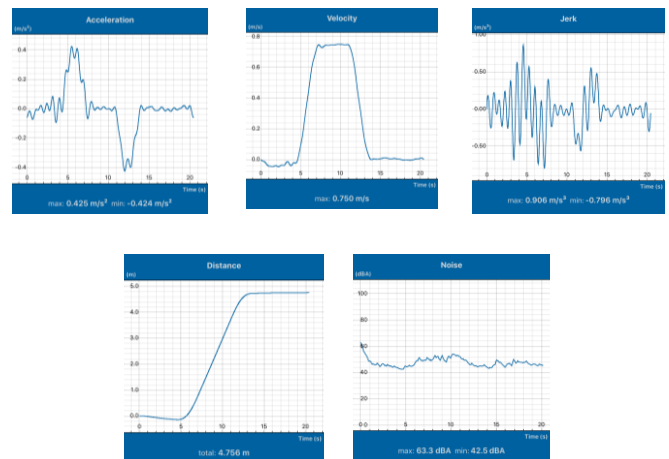

We can carry out a safety audit on your lift, including;

- ⊕ Doors
- ⊕ Controls
- ⊕ Mechanical guards
- ⊕ Electrical protection
- ⊕ Emergency communication

\$99 inc GST

REPORT

City Lifts will provide a comprehensive safety compliance report and also include a ride quality assessment.
