Reference of Company Dealings

Dear Sir,

Please be informed that DCE Electrical had engaged the services of City Lifts, through competitive tender, for the period from March 2014 to July 2015, where they successfully completed an upgrade to three (3) Passenger Lifts which were of a triplex group arrangement operating at 3m/s speed, followed by 12 months defects liability and servicing of these Lifts, within Telstra's #1 Strategic site in Perth, WA.

In particular their attention to detail during the design stage, and understanding of the need to keep the building operational 24 hours per day, provided for a content client during the project.

I would not hesitate in recommending them to any new client looking to engage their services.

Regards,

Ralf Mueller / Contracts Administrator
